

Enabling SEI to deliver next generation
Wealth and Investment processing
across 53 markets.

That's certainty

SEI is a leading provider of global asset management and investment processing solutions for the institutional and personal wealth management business. The challenge for SEI was to create a new technology platform supporting global wealth management outsourcing, capable of providing end-to-end investment and processing solutions. Tata Consultancy Services (TCS) implemented the GWS (Global Wealth Services) solution to provide scalable and efficient trade support processing capabilities with TCS B@NC'S Securities Processing as the backbone of GWS. As one of the world's leading financial technology providers, TCS enabled SEI to comprehensively automate the wealth management value chain, covering financial planning, trade processing, portfolio accounting, global clearing and settlement, asset servicing and funds administration. Equipping their wealth managers to now deliver a better customer experience and offer a comprehensive suite of products and services in 12 countries across 27 currencies, and trade on 53 exchanges. And of course, enabling SEI to experience certainty.
