

**CONTEXT RICH SYSTEMS** – We are moving towards a time when technology is not only able to respond to our numerous queries it is also able to predict them through as systems with embedded intelligence combine with pervasive analytics to achieve such result. This result is today based on understanding the context of requirements and providing form fitting results. A passing round would test team's ability in terms of contexts that dictate the directions of a systems approach.

**@TCS** – a round from the world of TCS

**INVISIBLE ANALYTICS** – Analytics has taken centre stage as the volume of data generated by embedded systems increases and vast pools of structured and unstructured data inside and outside the enterprise are analysed with a focus on the answers, not the data. Teams were given visuals along with a video/ audio piece to analyse and determine their source or common factor.

**INTERNET OF THINGS** - The final round was rapid round where the teams were presented with Visual/text based questions from the entire gamut of the world of technology, and the team was required to identify and answer.

**Subject:** TCS IT Wiz primarily focused on application of technology across various sectors and aspects, including technology environment, the business, people, new trends and legends. Other areas included:

- Emerging areas such as cloud computing, Internet of things, telecom, biometrics and robotics
- World of Internet and unique websites, IT buzzwords and acronyms.
- Areas where IT has made an impact - education, entertainment, books, multimedia, music, movies, internet, banking, advertising, sports, gaming ,social media and world of mobiles.
- IT personalities brands of IT and communication companies, the history of IT as well as its humorous side.
