

QUARTZ

Quartz™ Gateway

Challenge

The introduction of blockchain into an ecosystem implies that it needs to 'integrate' all connecting systems or nodes, such an integration is needed, to not only enable a handshake of existing systems with the blockchain and enable co-existence of these systems with blockchain, but to also allow the ecosystem to interface with other blockchain networks as well as standard messaging networks to ensure interoperability and leverage of data standards. In the absence of such an approach, enterprises would need to deal with significant challenges in rolling out services that leverage this technology.

Solution

Quartz Gateway is a single, smart channel that can help integrate applications with various blockchain platforms, industry networks and ecosystems using simple REST APIs. Using the Quartz Gateway, organizations can connect seamlessly to multiple blockchain platforms, thereby eliminating the need for large scale and continuous changes to be made to their existing systems. It facilitates interoperability between blockchains and with other messaging networks, and industry standards like ISO. It also supports orchestration of services across multiple blockchain platforms thus delivering agility and flexibility to organizations operating diverse business processes.

The Quartz Gateway's Command Center module helps a blockchain sponsor, to administer and maintain oversight of the entire blockchain network. It provides a comprehensive visual representation of all the activities taking place within the blockchain ecosystem at any point in time and allows the system administrator of the sponsor to make key decisions when administering the network.

Benefits

- Enables coexistence of existing systems with blockchain
- Offers audit features for all the messages and API service requests that are received and processed

Quartz Advantage

- The solution brings together third-party solutions, legacy applications and messaging middleware in a connected ecosystem
- Enables firms to connect to various platforms in a faster and efficient manner

About Quartz

Quartz offers innovation-led solutions that combine the benefits of DLT and AI. Built on the premise of 'trusted intelligence', the solution addresses business challenges across the entire value chain including development, integration, and governance of ecosystems for various industries including Financial Services, Banking, Supply Chain, Energy & Utilities and eGovernance. Backed by awards from Financial Technology Forum (Best Fraud Prevention Solution), SPM Excellence Award (by the Centre for Software and IT Management (CSITM) of Indian Institute of Management Bangalore), Asia Pacific Stevie Awards (Best Machine First Sanctions Screening), Juniper Research (Gold Winner for Digital Identity Innovation), the Asian Banker (Best Fraud Prevention Technology Implementation), Financial Technology Forum (Best New Post Trade Solution of the Year), Asset Servicing Times (Outstanding Innovation Award) and recognition from Analysts (ranked #1 Best Performing Fraud Management Solution by IBS Intelligence) Quartz can help organizations operate at the forefront of technology innovation.

About Tata Consultancy Services Ltd (TCS)

Tata Consultancy Services (BSE: 532540, NSE: TCS) is the technology partner of choice for industry-leading organizations worldwide. Since its inception in 1968, TCS has upheld the highest standards of innovation, engineering excellence and customer service.

It has set an aspiration to become the world's largest AI-led technology services company and is enabling its clients to transform themselves across the full AI stack, from infrastructure to intelligence.

Rooted in the heritage of the Tata Group, TCS is focused on creating long term value for its clients, its investors, its employees, and the community at large. With a highly skilled workforce spread across 55 countries and 202 service delivery centers across the world, the company has been recognized as a top employer in six continents. With the ability to rapidly apply and scale new technologies, the company has built long term partnerships with its clients – helping them emerge as perpetually adaptive enterprises. Many of these relationships have endured into decades and navigated every technology cycle, from mainframes in the 1970s to artificial intelligence today.

TCS sponsors 14 of the world's most prestigious marathons and endurance events, including the TCS New York City Marathon, TCS London Marathon and TCS Sydney Marathon with a focus on promoting health, sustainability, and community empowerment.

TCS generated consolidated revenues of over US \$30 billion in the fiscal year ended March 31, 2026.
