

Node JS

Roles – Developer / Sr. Developer/ Tech Lead

Key Areas:

- Develop and maintain server-side logic using Node.js and associated frameworks (Express.js, Nest.js)
- Design and build RESTful and GraphQL APIs
- Integrate with databases (SQL & NoSQL), external APIs, and third-party services
- Implement security and data protection best practices
- Collaborate with frontend developers, DevOps, QA, and product teams
- Write clean, scalable, and well-documented code
- Strong knowledge of JavaScript (ES6+) and TypeScript
- Proficient in working with databases: MongoDB, PostgreSQL, MySQL, or Redis
- Experience in building and consuming RESTful and GraphQL APIs
- Familiarity with Docker, Kubernetes, or cloud environments like AWS, Azure, or GCP
- Good understanding of asynchronous programming, event-driven architecture, and microservices
