

ERP on Cloud Platform

Platform Solutions

As organizations pursue to achieve greater agility, increased market and customer focus, and streamlined operations, ERP systems continue to provide the foundation for resource planning, transaction management, and process integration across the functional areas of an enterprise. With cloud based solutions providing on-demand services and shared resources, the conventional wisdom of an in-premise, highly customized, and complex ERP deployment has questionable business value today.

Tata Consultancy Services (TCS) ERP on Cloud Platform is a pre-built, hosted enterprise application powered by Tier 1 ERP systems to help fill functional gaps, improve business processes, and enable efficient global business services. The platform is offered through Software-as-a-Service (SaaS) and Business-Process-as-a-Service (BPaaS) models, and provides a single point of ownership, improved performance metrics, adherence to service level agreements (SLAs), and intelligent analytical insights.

Overview

Changing circumstances and market conditions can limit the effectiveness of a traditional ERP system. Based on business considerations, organizations may decide to opt for a new fully integrated core ERP suite or to upgrade an existing one. Both these situations entail significant time and effort, as well as costs associated with replenishing aging IT infrastructures, incremental application license fees, implementation, and maintenance. Additionally, ERP deployments require significant process redesign and accompanying change management.

TCS ERP on Cloud Platform provides a reliable, scalable, and secure cloud based solution for your enterprise operations. The platform spans processes such as procurement, supply chain,

manufacturing, sales and distribution, customer service, human capital management, finance and accounting, budgeting and planning. Our platform's mobile and analytics capabilities enable deeper engagement with stakeholders and provide contextual insights for data driven decisions. We combine business process services, helpdesk support, application, and infrastructure to provide a single point of accountability. With preconfigured and standardized business processes, workflows, integration framework, and implementation accelerators, we help reduce localization and customization to ensure a smooth and fast implementation. Moreover, we offer a flexible pay-per-use pricing model that is aligned with your changing business needs, thus enhancing scalability and optimizing operating expenses.

Benefits

By combining our strengths in IT, infrastructure, and delivery, TCS ERP on Cloud Platform offers a unique transformational approach. This helps you to:

Enhance operational agility and efficiency

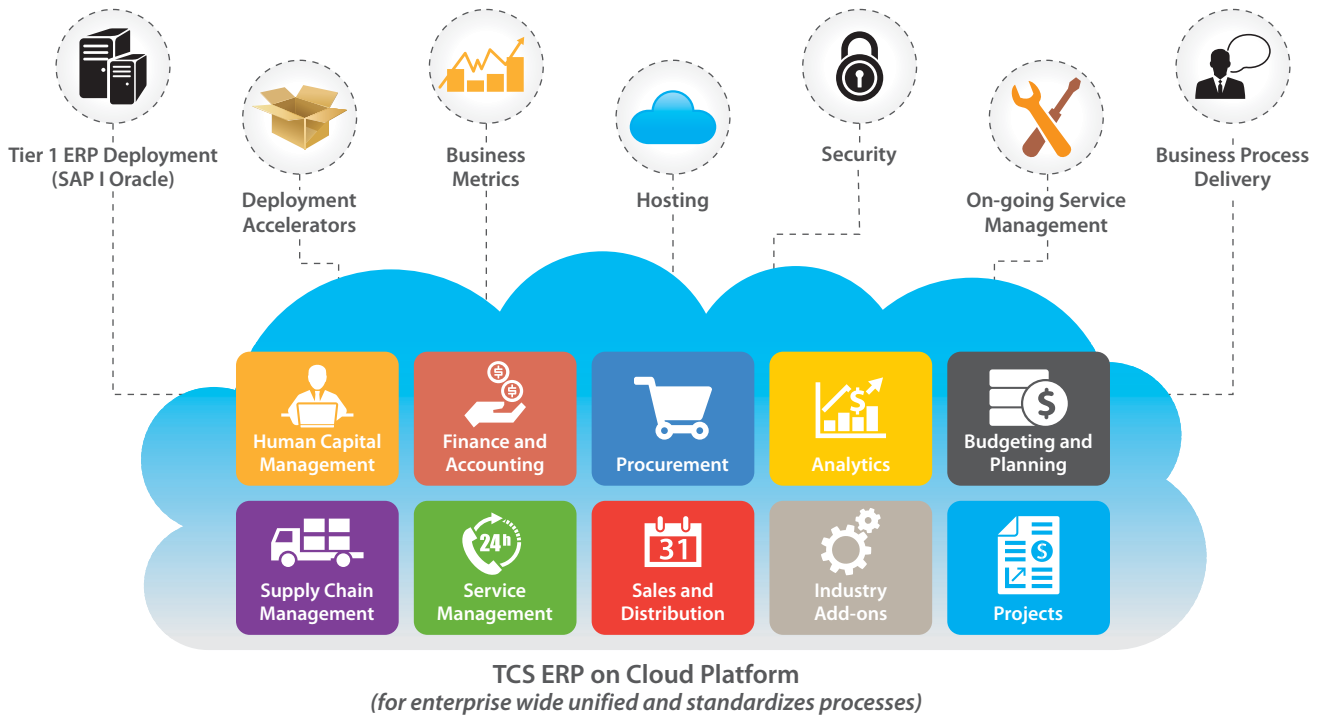

By streamlining process management, enhancing service automation, and improving service delivery, our solution helps you improve business outcomes such as quality, productivity, cycle time, and effectiveness. It enables you to meet your SLAs and ensures high performance of processes and systems.

Achieve informed decision making

Analytics-driven, actionable insights provide a single view of your business to help you make better, timely decisions.

An Overview of ERP on Cloud Platform

Faster Time to Market | Lower TCO | Flexible ERP License Ownership | Excellent SAP and Oracle Expertise | Compliance and Risk Management | Flexible and Scalable | SLAs and KPIs

The TCS Advantage

TCS' extensive domain understanding, focused services, and extensive experience make us the ideal partner for your needs. With our strategic alliances, we help you gain from:

- **A single point of accountability:** We provide a comprehensive, global platform, which helps you reduce TCO by offering a single point of accountability for infrastructure, information technology, and business process management.
- **Multiple solution delivery options:** We offer delivery options of Software-as-a-Service (SaaS) and Business-Process-as-a-Service (BPaaS) models, depending on your business requirements. The pay-per-use pricing model enables you to minimize your capital investment.
- **Convergence of areas of expertise:** Our technology, domain, and people management experience ensures that our solutions meets dynamic client demands and adheres to industry best practices.
- **Swift deployment:** With our robust set of tools and deployment accelerators, you can quickly deploy the solution and consolidate your processes.

Enhance scalability

Our solution's standardized and consolidated processes enable you to scale quickly to meet the growing needs of your business.

Improve compliance and control

Meet regulatory and compliance requirements by harmonizing and standardizing global business processes, and improve process control with shared services capabilities.

Reduce costs

Reduce operating expenses by optimizing the efficiency of existing processes. The pay-per-use model reduces your total cost of ownership (TCO).
