Enterprise Cloud Software Migration Services for Oracle

Enterprise Application Services

As enterprises across the globe strive to improve scalability, harnessing new opportunities without impacting business-as-usual, the cloud could be a driver for innovation and growth. An intelligently architected cloud ecosystem helps organizations reduce ongoing IT expenses as well as the total cost of ownership (TCO). On a hosted cloud-computing model, your cloud partner quickly resolves IT issues eliminating the need for in-house IT staff. Further, expensive hardware infrastructure is no longer required, allowing companies to scale fast while maintaining profitability.

TCS' Enterprise Cloud Software Migration Services for Oracle accelerates a company's journey from on-premise infrastructure to a next-gen cloud environment. This spans all the key functions across the back, middle, and front offices, with a focus on end-to-end transformation and harmonization. Tata Consultancy Service (TCS) understands that every enterprise requires a unique and individualized pathway to the cloud. Our Enterprise Cloud Software Migration Services are equipped for a variety of requirements, be it full-suite cross-geography implementation or an incremental approach where non-critical workloads are transitioned first.

Overview

Modern enterprises are eager to leverage the cloud as a key driver for agility, process simplification, and organizational growth. With minimal hardware dependencies, companies can become more nimble, adapting to changing business needs. This also makes operational expansion much easier, where enterprises can explore new possibilities without incurring massive capital expenses. Unfortunately, companies wanting to move to the cloud often fear business disruption because of ineffective implementation. Further, they struggle to identify the best-fit transformation plan, unable to prioritize functional modules and plan the way forward.

TCS aids companies on their cloud migration journey, implementing an Integrated Oracle Cloud ecosystem while ensuring business continuity. Our Enterprise Cloud Software Migration Services for Oracle are backed by proven solution frameworks and TCS' Transformation Delivery Method for Oracle Cloud. As a result, clients can action a world-class cloud-based environment -- designed for high scalability and low investments -- gaining a definite market advantage. Importantly, TCS is an Oracle Cloud Elite Partner, responsible for the first ever integration of Oracle Sales CX with Oracle ASCP/Demantra. This makes us a trusted partner to clients across industries and sectors, looking to make their front, middle, and back-office systems efficient and future-ready.
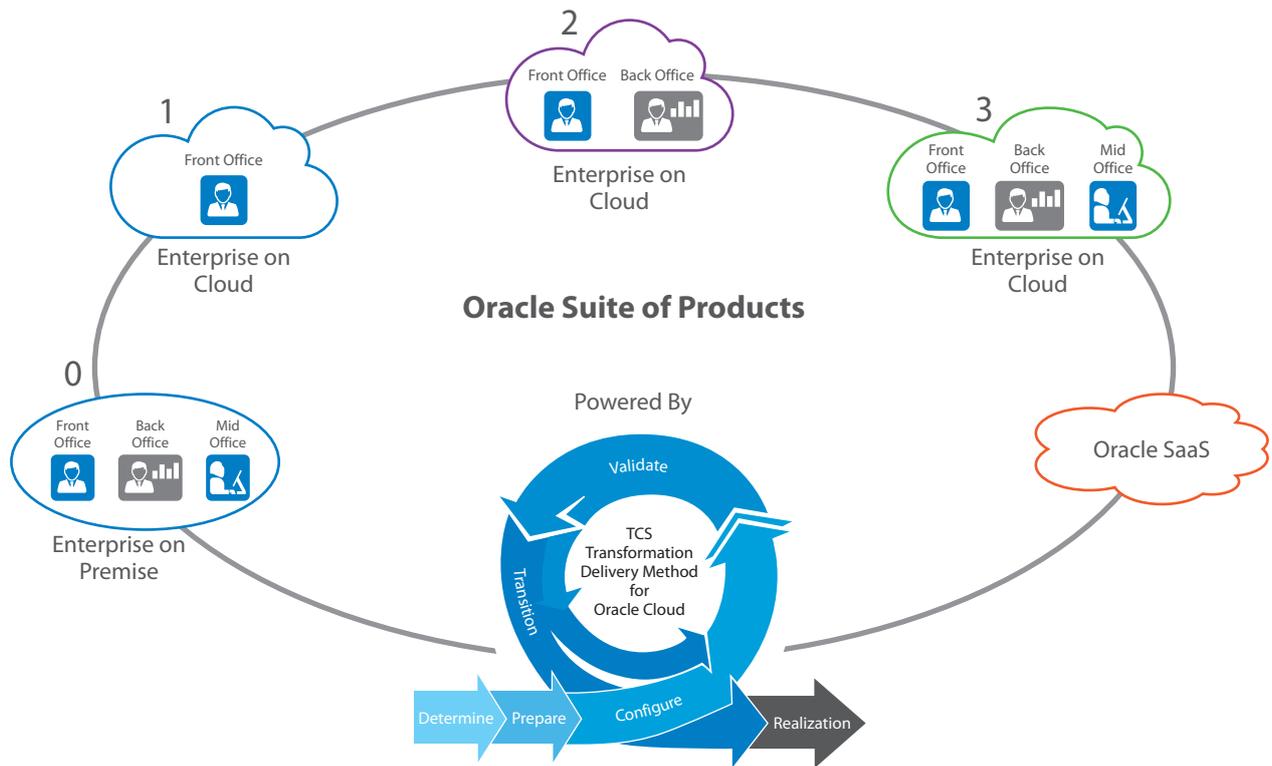

Our Solution

TCS' Enterprise Cloud Software Migration Services for Oracle reimagines your cloud journey, ensuring all critical operations are moved to the cloud with zero impact on business continuity. As a result, clients can gain from an agile and cost-optimized cloud environment, through the following capabilities:

Front office transformation - Migrates customer-facing functions such as marketing, sales, and customer services to Oracle cloud applications, improving customer experience and delivery quality

Back office modernization - Transitions back-office functions via Oracle's software-as-a-service (SaaS), platform-as-a-service (PaaS) and infrastructure-as-a-service (IaaS) frameworks, minimizing the need for upfront spends

Middle office innovation - Drives efficiency for mid-office operations by streamlining the setup of new business processes such as product launches, new services/offerings introduction, strategy formulation, and supplier management

TCS' Oracle Integrated Cloud Solution

Benefits

By utilizing Oracle's best-in-class cloud technologies and TCS' field-proven Enterprise Cloud Software Migration Services, you can achieve the following benefits:

Faster implementation - Expedite your journey to Oracle Cloud and transition on-premise processes within short timelines

Seamless integration - Create a unified enterprise environment supporting co-existence with hybrid cloud, as well as interlinking with cloud-to-cloud and cloud-to-on premise applications

Heightened agility - Engineer a cloud-based ecosystem capable of rapidly responding to changing business conditions, upscaling or downscaling operational capacity as per demand

Accelerated growth - Establish the requisite digital foundation for adopting new locations, business opportunities or revenue models while maintaining business continuity

Smarter processes - Automate and simplify business process management, easing information flows within the enterprise and enhancing decision-making

The TCS Advantage

By partnering with TCS, clients can leverage these key differentiators:

Oracle cloud partnership - TCS functions as a trusted partner to enterprises embarking on their cloud migration pathway, helping outline their unique business requirements and transition roadmap. TCS is recognized as an Oracle cloud elite partner with years of experience in spearheading Oracle cloud implementations.

Transformation delivery method - The solution is powered by TCS' proven transformation delivery method for Oracle cloud, addressing multiple layers to accelerate the transition from on-premise to cloud infrastructure.

World-first innovation - TCS' Enterprise Cloud Software Migration Services has helped deploy the first ever integration of Oracle sales CX with Oracle ASCP/Demantra.

How we help our customers

Avis Budget Group, a global vehicle rental company, was looking to transform its sourcing workflows to strengthen contract management and reduce procurement costs. This meant replacing the existing manual and fragmented processes with a cloud-based next-gen solution. Avis partnered with TCS to address its sourcing bottlenecks, making key functions consistent across geographies. TCS implemented the Oracle Fusion Procurement Cloud Sourcing module for the company's tendering processes and Oracle Fusion Procurement Cloud Contract module for contract lifecycle management. The solution enabled better communication between sourcing teams, increasing operational visibility across 20 geographies.
