

Services for SAP S/4HANA

Enterprise Application Services

Against a backdrop of an increasingly digital, networked, and complex business landscape, enterprises need the combined power of simplification and innovation to drive competitive advantage. SAP Business Suite 4 HANA (SAP S/4HANA) is designed to serve as a digital business foundation, helping enterprises predict consumer preferences and business outcomes, and drive digital transformation. SAP S/4HANA helps companies simplify, manage, and run the enterprise by connecting people, networks, and systems. To unlock real business value and ensure rapid and smooth implementation of SAP S/4HANA, enterprises need the right partner.

Tata Consultancy Services (TCS) helps companies accelerate adoption of SAP S/4HANA with a full spectrum of value-added services such as consultation, deployment, and support. By orchestrating a smooth rollout of the in-memory platform, we accelerate business innovation and enhance your data analytics capabilities.

Overview

Today's highly complex and hyper-connected business landscape requires enterprises to keep pace with changing consumer and regulatory demands, innovate, and boost business agility. Traditional Enterprise Resource Planning (ERP) systems can't rapidly adapt to change or process the explosion of data to deliver insights on consumer preferences, business opportunities or operational efficiencies. Companies need to upgrade their digital platform to foster business growth, instead of hindering responsiveness. SAP S/4HANA is designed to address these requirements. However, to commit the time and resources needed to migrate to SAP S/4HANA, companies need the assurance of success. The lack of right experience, expertise, and supporting assets is often the biggest challenge here.

With TCS' support, companies can adopt the latest business solutions from SAP on the SAP HANA platform. Our services address both, brownfield (traditional SAP) and greenfield (non-SAP ERP platforms) conversion to SAP S/4HANA. With our structured methodology tailored to your enterprise's needs, you can ensure the success of your SAP S/4HANA adoption.

Our Solution

TCS understands your preferences and business goals and helps you adopt components of SAP S/4HANA accordingly.

We offer:

- **Advisory and assessment services:** Enterprise-specific recommendations for business transformation, IT architecture, and benefits of SAP S/4HANA, including deployment approach
- **Proof of Concept (PoC):** Executing PoCs based on SAP best practice and/or with your specific business scenario
- **Implementation and conversion services:** Assisting in SAP S/4HANA adoption to phase out SAP and non-SAP legacy platforms or convert current SAP ECC to SAP S/4HANA
- **Value added services:** Managing specific services for SAP S/4HANA projects across the entire project lifecycle with TCS tools or with other SAP or non-SAP tools
- **Support Services:** Assisting companies to operate and run their SAP S/4HANA platform with other applications

Benefits

With TCS' support, you can harness the capabilities of SAP S/4HANA to:

Increase customer satisfaction: Ensure customer delight by swiftly responding to their changing preferences; provide personalized services with the help of a highly responsive business suite

Improve business agility: Consolidate, simplify, and streamline business processes with a simplified ERP environment that ensures faster response to market changes and consumer preferences

The TCS Advantage

By partnering with TCS, you benefit from our:

- **Strategic alliance with SAP:** TCS has been working on SAP delivery and engagements since 1998. We are the exclusive global partner for SAP's internal landscape, overseeing the maintenance and deployment of all their IT systems. With a 21,200-strong SAP practice spread across geographies, TCS delivers real value to over 550 ongoing engagements.
- **SAP HANA expertise:** TCS has a pool of over 16,800 consultants trained in S/4HANA and a 2,200+ team of HANA experts. TCS' consultants constantly keep abreast of the latest innovative offerings from SAP.
- **Dedicated center of excellence:** Our dedicated SAP Center of Excellence (CoE) focuses on providing thought leadership across the portfolio of SAP digital technologies to help customers evaluate their roadmap for effective SAP S/4HANA implementation.
- **Innovation and demo centers:** Our global innovation and demo centers in the USA, France, India, and Japan help our customers get a first-hand experience on new SAP products and offerings.
- **Tools and accelerators:** We use ready tools for assessment, testing, data migration, system checks for SAP S/4HANA. Combined with TCS' Transformation Delivery Method (TDM) based on SAP ACTIVATE, these tools enable companies to adopt SAP S/4HANA faster.
- **Market leadership:** Our proven excellence in delivering client value is reflected in TCS being recognized as a **Leader in SAP HANA and S/4HANA Services by NelsonHall**, and a **Leader in 2018 Gartner's Magic Quadrant for SAP Application Services**.

Drive innovation: Integrate SAP HANA with Big Data and Internet of Things (IoT) networks to drive improved business decision making; achieve higher accuracy in financial forecasting and scenario analysis, and discover real-time opportunities with analytical insights

Reduce technology costs: Minimize data replication and footprint, and reduce efforts in setting up new a system to lower the total cost of ownership (TCO) of your ERP platform
