

# TCS Power Platform Services

Microsoft Business Unit

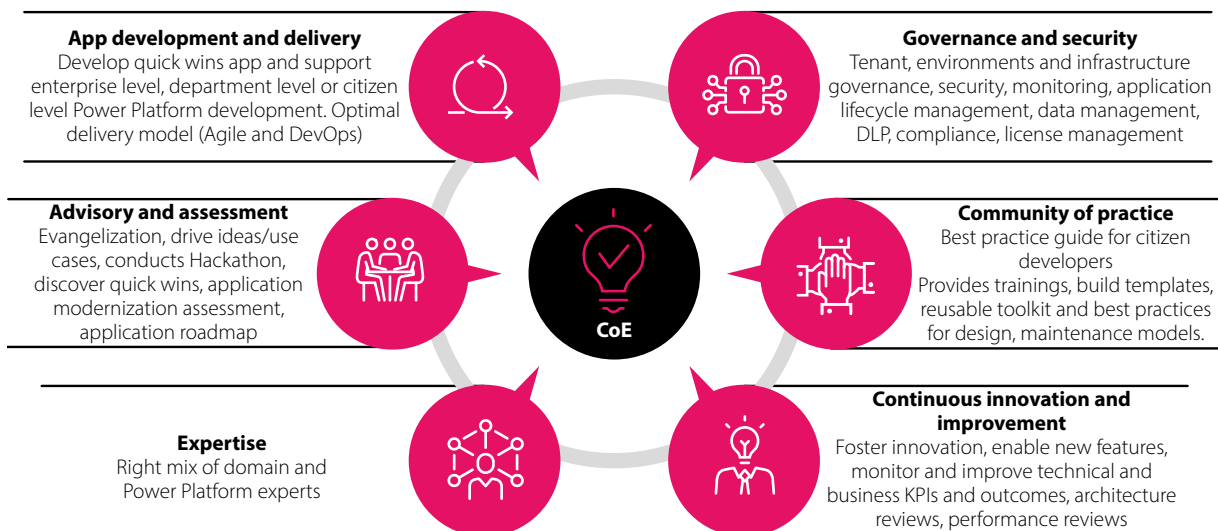

The recent acceleration in digital transformation has generated a demand for the quick deployment of custom solutions to enable automation and high ROI. The need for non-IT developers has also influenced the rise in low-code or no-code solutions, which eliminate the need for specialists and reduce the outsourcing of innovation or differentiated offerings. A solution that leverages SaaS and PaaS-based low-code platform can help enterprises accelerate digital innovation and transformation by democratizing development.

TCS Power Platform Services is a legacy application modernization solution that helps enterprises transform their digital architecture with rapid application development and cloud-native technologies. The solution democratizes application development with a low-code, no-code approach and empowers business users with citizen-led development. The solution digitizes and automates paper-based manual processes by building an application modernization roadmap and implementing the Power Platform Center of Excellence.

## Overview

Due to the high cost involved in traditional application development, enterprises are finding it increasingly challenging to achieve high business value on application development. The cost and time associated with development efforts further add to the cost, impacting the return on investment. The dependency on IT and shortage of highly skilled resources due to the dependence of learning curve on skills based on traditional application development also make agility a challenge due to the rise in application development backlog. Enterprises need business-driven application development and hyper-automation to design quickly deployable customer software solutions, which increases the time to value.

TCS Power Platform Services leverage Microsoft Power Platform to help transform legacy applications with digital technologies and methodologies. The solution offers low code, no code solutions with new-age technologies such as Power BI, PowerApps, Power Automate, Microsoft RPA and Power Virtual Agents to cover a range of services across all its products from advisory and foundation to sustenance and governance. The solution provides actionable data-driven applications with rich UI/UX customizable business logic, low code automation and smart chatbots to improve business processes, systems, and workflows, and facilitates quick deployment of custom software solutions to accelerate digital transformation.

#### Leveraging Microsoft Power Platform Center of Excellence (CoE) Starter Kit

*Key components of TCS Power Platform solution*

## Our Solution

TCS Power Platform Services provides the following solutions:

- **Advisory:** Perform application landscape assessment and fitment analysis of existing applications with a decision framework accelerator to identify the right solution and platform.
- **Foundation:** Leverage power platform deployment architecture, user license management, platform security design and best practices to establish a foundation for streamlined power platform deployment and delivery.
- **Implementation:** Enable power platform solution delivery, facilitate implementation activities, and develop last-mile applications for business process automation and RPA-based solution enablement.
- **Self-service:** Accelerate citizen-led development with activities such as developing reusable toolkit/templates/components and conducting hackathons for end-user adoption to enable self-service.
- **Sustenance and governance:** Carry out platform support activities and establish robust governance on power platform with security, monitoring, administrative management, and application lifecycle management.

# Benefits

TCS Power Platform Services provides the following benefits:

- **Digital transformation:** Accelerate digital innovation and transformation with shorter development cycles. Enable rapid application development involving low-code developer to pro-code developer approach.
- **Employee productivity:** Improve in line-of-business employee productivity with easy user adoption and business user empowerment with citizen-led development.
- **Faster time-to-market:** Increase application delivery speed and enable faster time-to-market by quickly building a line of business extensions and custom business processes on top of existing investments in systems of records.
- **Enterprise-wide adoption:** Facilitate streamlined enablement of power platform for enterprise-wide adoption and reduce TCO while increasing ROI.
- **Easy migration:** Migrate legacy applications to Power Platform and establish a robust governance framework to ensure seamless business operations.

## Why TCS

A partnership with TCS provides these advantages:

**Research-backed solutions:** TCS' Azure experts have the requisite domain knowledge to provide customized, research-backed solutions for seamless business platform migrations. Our 360° partnership with Microsoft allows us to work closely with the SMEs at Microsoft and provide world-class migration factory services using need-based expert guidance. TCS is a Microsoft Gold Competency Partner and has proven expertise of emerging technologies acquired through previous experiences.

**Consumption-based pricing:** TCS offers an attractive catalog-based pricing model, with a pay-as-you-go option. Our solution allows businesses to pay only for services realized on the cloud, and de-risk themselves from making huge investments on platform migrations.

**World-class digital solutions:** TCS has a proven track record of transforming legacy applications, and delivering solutions infused with world-class digital technologies and methodologies. We provide end-to-end bespoke solutions crafted to meet your specific business needs and help you realize exponential value.

**Proven expertise:** TCS provides a full range of services from advisory to implementation across all the products of Power Platform. Our large pool of experienced and certified consultants on power apps, automate and PVA, and power BI leverage a rich repository of assets and solution accelerators that help you facilitate a seamless migration and transformation experience for your organization.
