Accelerating Change

Technology is evolving faster than ever before.
Businesses must keep pace and transform, or perish

What about Enterprise IT?

**Technology is revolutionizing how business runs ...
but planning & running of technology is still very manual**

40%

of CIO's time spent in
ensuring reliable day-
to-day operations

80%

of outages caused by
people and process
issues

54%

of the leaders feel
that IT fails to meet
business needs

Time to **reimagine** enterprise IT operations

Global launch ————— • June 4, 2015, New York, USA

People-centric Services

- Fragmented
- Inconsistent
- Reactive
- Manual

Services-as-software

- Unified, context-aware
- Agile and consistent
- Proactive
- Autonomous

**Neural automation
product for IT operations**

**To create the category
“Software-defined Services”**

- Cognitive system for enterprises
- Redefines automation

Ignio : Your

Adaptive
cruise control
