

TCS 2021 Global Financial Leadership Study

# Closing the FP&A gaps

In the TCS 2021 Global Financial Leadership Study, finance executives revealed what they consider their biggest gaps in FP&A capabilities.

Percentage of respondents who ranked the following as their biggest FP&A capabilities gaps

Risk-evaluation practices are too rigid

Lack of scalability to meet new business demands

Lack of insights into business patterns

Unable to execute forecasting cycle in the short term

Lack of predictive planning and forecasting capabilities

With a broad range of capability gaps stalling progress, setting priorities is a challenge.

Many respondents are investing in technology to close FP&A gaps.
